

WATER JET CUTTING SERVICES

ERW Inc. announces the installation of a Flow International – Abrasive Waterjet System as a complement to our Laser Cutting and EDM Wire capabilities.

Work Piece Size:	72" X 144", up to 8" thick
Standard Tolerance:	+/- .005" for thicknesses up to 2"

Equipped with Dynamic Waterjet Feature with Active Tolerance Control to be able to cut **without taper**, yielding higher precision parts than conventional waterjet machines.

Materials that can be cut include:

- Steel: Mild, stainless, tool, high alloy, hardened
- Aluminum, titanium, brass, copper, bronze
- Inconel, hastelloy, tungsten, cobalt, zirconium
- Composites, Plastics, Rubber, Foam, Glass, Granite, Fiberglass, Kevlar

- No heat affected zone
- Great for cutting near net shapes ready for final machining
- No mechanical stresses
- Optimal use of material/nesting
- Choice of edge qualities
- We can cut your material or ours
